

LEFS Interpretation:

LEFS score = SUM (points for all 20 activities) Interpretation:

- Minimum score: 0
- Maximum score: 80
- The lower the score the greater the disability.
- The Minimal Detectable Change (MDC) is 9 scale points.
- The Minimal clinically Important Difference (MCID) is 9 scale points.

Percent of maximal function = (LEFS score) / 80 * 100 Performance:

- The potential error at a given point in time was +/- 5.3 scale points.
- Test-retest reliability was 0.94.
- Construct reliability was determined by comparison with the SF-36. The scale was found to be reliable with a sensitivity to change superior to the SF-36.
